

2. A Health Certificate and an Oculist's Certificate, to be sent directly to the College by the examiners.
3. A Financial Agreement for the full fee, or an Application for a Scholarship Grant in the form of a reduced fee, signed by the person responsible for the applicant's fees. (See Fees).

The College will write directly to the references given on the Application for Admission, and for records of previous work.

A personal interview with a representative of the College is required when this is at all possible.

The Admissions Committee does not require but would be pleased to receive from the applicant an original piece of writing. A specimen or a description of work done in a field of special interest may also be submitted.

It has been found desirable, under certain circumstances, for a prospective student to visit the College before applying for admission. The time preferable for doing this is during the semester preceding the one in which he wishes to matriculate. The Committee will not decide upon an applicant while he is visiting the College.

No students will be accepted for a short trial period.

Applicants, upon admission, are expected to comply with certain financial arrangements. (See Payment of Fees)

Students may enter at any time during the College year. However, the date at which a student desires to enter must be clearly indicated on his application blank, and he is admitted for entrance at that time only. If, after being notified of his admission, he finds it necessary to postpone his arrival for more than six weeks beyond the date appointed for entrance, his admission is automatically cancelled and his application must come before the Committee a second time. If such postponement defers the student's entrance until the following academic year, a new application is required, together with a second application fee.

Students who withdraw from the College without obtaining a leave of absence from the Faculty must make regular application for re-admission if they wish to return.

All correspondence pertaining to application for admission should be sent to the Registrar.

## HEALTH

An Oculist's Certificate and a Health Certificate, which includes a serological test, is required of all students for admission. All entering students are urged to be immunized against smallpox, diphtheria, and typhoid fever. The College reserves the right to insist upon inoculations at any time should occasion for them arise; and to insist upon any health measures that its medical consultants may prescribe.

An infirmary has been provided in which people suffering from
